

What's new in version 2021.5

This topic lists additions and improvements incorporated in IWLIVE Pro WS version 2021.5 which were not available in previous versions.

Please note that this new version also includes various enhancements and bug fixes that are not described in detail here.

Use latest network version check box now available

Use latest network version check box is now available in the [Request Projection](#) dialog, which allows you to use the latest network (and control) version for the simulation.

Projection runs are not automatically loaded when Incident and Response runs are open

[Projection runs](#) will not load automatically when you have an Incident run or Response run open. To load, click on the Projection run.

Last time of verification

If verification is running for a Baseline (requires that IWLIVE Server is running) then IWLIVE Operator will display the last time at which verification was performed.
