

What's new in InfoWorks WS Pro version 2021.3

This topic lists the additions and improvements incorporated in InfoWorks WS Pro Version 2021.3 which were not available in previous versions.

Please note that this new version also includes various enhancements and bug fixes that are not described in detail here.

Inoperable field available in Grid, Editor and Property Page

Inoperable field is now available in Grid, [Properties Editor](#), and [Property Page](#) to mark a Valve Control when it is not operable, such as when it is jammed or cannot be adjusted.

Break Flow Type can now be set to Fixed or Pressure Related

Break Flow Type can now be set to **Fixed** or **Pressure Related** in Grid, Properties Editor, and Property Page for [Pipe Breaks](#) when the Break Type set to **Flow**.

UTF-8 encoding option available for CSV export

It is now possible to use UTF-8 encoding system when exporting to CSV. This option is available in the [Select CSV Export Options dialog](#). UTF-8 is of particular relevance to customers using non-Western Latin characters.

Upload to Info360

This is now seamless, allowing you to upload into Info360 automatically using the [Upload to Info360](#) functionality.

Report option in Boundary Trace

There is a new **Report** button in the [Boundary Trace dialog](#) that produces a report on valves to be closed or ignored.
