

## What's New in this Version

---

This topic lists all the additions and improvements incorporated in ICMLive® Operator Client 2021.8 which were not available in previous versions.

### Help menu

The order of the options in the [Help](#) menu has been changed so that the **Help** option is now the first item in the list. Previously, it was [Desktop analytics](#) but this now appears further down the list of options.

### Authentication required for a workgroup data server

By default, a [workgroup data server](#) now requires users to be authenticated. See the **Workgroup Data Server Administration Guide** for further information.
