

## What's New in Version 2021.7

This topic lists all the additions and improvements incorporated in ICMLive Operator Client 2021.7 which were not available in previous versions.

### Expiry warning for Thales licences

If you are using a Thales license, a [warning message](#) will now be displayed by default when ICMLive Operator Client is started, if Thales licence is within one month of its expiry date. When the license is within a week of its expiry date, the message will be shown daily.

If you do not want the warning displayed, you can either uncheck the **Remind me later** option on the warning dialog, or use the **Licence expiry date reminder** option on the [General Page](#) of the [Options Dialog](#) to disable the display of the message.

### InfoWorks About box

The [About box](#) has been updated and now displays licence agreement information about your current ICMLive Operator Client installation, the version number of the installed software, and the licence name, which is read from the dongle or server.

Further information, such as the licence number, the version of the operating system you are using and the name and location of the master database, which was previously displayed in the About box, is now displayed in a new Additional Information window. This window can be displayed by clicking on the new **Additional Information** button in the About box.
